

01/11/21

Monday

m_0, m_1, \dots, m_7
 M_0, M_1, \dots, M_7

$$F(x, y, z) = xy + x'yz$$

$$= xy \cdot 1 + x'z \cdot 1$$

$$= xy \cdot (z + z') + x'z \cdot (y + y')$$

$$= xyz + xz' + x'y + x'y'z$$

$$= \sum (1, 3, 6, 7)$$

$$\therefore \text{Sum of minterms of } F = \sum (1, 3, 6, 7)$$

$$\therefore \text{Product of maxterms of } F$$

$$= \prod (0, 2, 4, 5)$$

$$\begin{aligned} 111 &\rightarrow 7 \\ 110 &\rightarrow 6 \\ 011 &\rightarrow 3 \\ 001 &\rightarrow 1 \end{aligned}$$

$$\begin{aligned} m_1 + \\ m_3 + \\ m_6 + \\ m_7 \end{aligned}$$

$$\begin{aligned} 110 &\rightarrow 0 \times 2 = 0 \\ &\rightarrow 1 \times 2 = 2 \\ &\rightarrow 1 \times 2 = 4 \end{aligned}$$

Standard forms

Sum of products

Boolean expression

Containing AND terms

of one or more literals each

Standard form

SOP

$$(\underline{\quad \cdot \quad}) + (\underline{\quad \cdot \quad}) + (\underline{\quad \cdot \quad})$$

Every term is made up of only AND operation

Product of sums

Boolean

expression

containing 'OR' terms

Canonical form

SOP of

Sum of minterms

$$(\underline{\quad \cdot \quad}) + (\underline{\quad \cdot \quad}) +$$

$$(\underline{\quad \cdot \quad}) + \dots$$

Every term

is made up of

AND operation

and containing

all the variables

Disjunction $\vee \rightarrow OR$
Conjunction $\wedge \rightarrow AND$
Negation \neg & $\sim \rightarrow$ complement
