Unit-4
Patterns for testing

Time dependent, async

Presented By Dr.R.Kavitha,SoC

SASTRA University

Sample three patterns are: [Mar02]

- Pattern name: Pair testing
  - Abstract: A process-oriented pattern, pair testing describes a technique that is analogous to pair programming in which two testers work together to design and execute a series of tests that can be applied to unit, integration or validation testing activities.

- Pattern Name: separateTestInterface
  - Describes how to create a test interface that can be used to describe specific tests on Internal classes that are only visible to internal

Sample three patterns are: [Mar02]

- Pattern name: scenario Testing

  - Abstract: after unit, integration test, user acceptance test to be conducted, scenarioTesting describes a technique for exercising the software from the user's point of view. A failure at this level indicates that the software has failed to meet a user visible requirement.
